

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (currently amended) ~~Use in the preparation of a medicament for prophylaxis or treatment of~~ A method of preventing or treating an acute inflammatory disorder in a mammalian patient ~~of comprising administering~~ an effective amount of pharmaceutically acceptable bodies carrying an effective number of phosphate-containing groups presented or presentable on the surface of said bodies, the phosphate-containing groups comprising a plurality of phosphate-glycerol groups or groups convertible to such groups, ~~to inhibit and/or reduce the progression of the acute inflammatory disorder,~~ said bodies being of a size from about 20 nanometers(nm) to 500 micrometers(μm).
2. (currently amended) ~~Use as claimed in~~ The method of claim 1, wherein the acute inflammatory disorder features an upregulation of at least one pro-inflammatory cytokine.
3. (currently amended) ~~Use as claimed in~~ The method of claim 2, wherein the pro-inflammatory cytokine is selected from TNF-α, INFγ, IL-1 and IL-12.
4. (currently amended) ~~Use as claimed in~~ The method of claim 1, wherein the acute inflammatory disorder features a downregulation of at least one anti-inflammatory cytokine
5. (currently amended) ~~Use as claimed in~~ The method of claim 4, wherein the anti-inflammatory cytokine is selected from TGF-β, IL-10 and IL-4.
6. (currently amended) ~~Use as claimed in~~ The method of claim 5, wherein the anti-inflammatory cytokine is TGF- β.
7. (currently amended) ~~Use as claimed in any preceding claim~~ The method of claim 1, wherein the bodies are essentially free of pharmaceutically active entities other than phosphate-containing surface groups.

8. (currently amended) ~~Use as claimed in any preceding claim~~ The method of claim 1, wherein the phosphate-glycerol groups constitute 60% - 100% of the phosphate-containing surface groups on the bodies.

9. (currently amended) ~~Use as claimed in any preceding claim~~ The method of claim 1, wherein the phosphate-glycerol groups correspond to the formula $:-O-P(=O)(OH)-O-CH_2-CH(OH)-CH_2-OH$

10. (currently amended) ~~Use as claimed in any preceding claim~~ The method of claim 1, wherein the bodies are liposomes constituted to the extent of 60 - 100% by weight of a phosphatidyl glycerol phospholipid corresponding to the formula :

where R and R¹ are independently selected from C₁ – C₂₄ hydrocarbon chains, saturated or unsaturated, straight chain or containing a limited amount of branching wherein at least one chain has from 10 to 24 carbon atoms.

11. (currently amended) ~~Use as claimed in any preceding claim~~ The method of claim 1, wherein the acute inflammatory disorder is acute allergic or toxic reaction from surface contact with environmental allergen or drugs through anaphylactic shock.

12. (currently amended) ~~Use as claimed in~~ The method of claim 11, wherein the acute inflammatory disorder is allergic contact dermatitis or acute hypersensitivity.

13. (currently amended) ~~Use as claimed in any of claims 1-10~~ The method of claim 1, wherein the acute inflammatory disorder is acute neurological inflammatory injury.

14. (currently amended) ~~Use as claimed in any of claim 1-10~~ The method of claim 1, wherein the acute inflammatory disorder is acute neuronal injury resulting from cardiopulmonary bypass surgery.

15. (new) The method of claim 1, wherein preventing or treating an acute inflammatory disorder comprises inhibiting and/or reducing the progression of the acute inflammatory disorder
